

Speed Calmers

Low-jolt modular speed calming

Speed Calmers offer a smoother, less aggressive profile than traditional speed bumps. The longer module reduces vehicle impact while still achieving effective speed reduction — protecting cargo, reducing suspension wear and improving driver comfort. Units are surface-fixed with no excavation on concrete, asphalt or block paving, and combine into runs of any carriageway width using handed end modules.

KEY BENEFITS

- Longer, less aggressive profile than a speed bump
- Flexible construction follows surface undulations
- Protects cargo and reduces suspension wear
- Modular — runs assembled in 1750 mm increments
- Installs on concrete, asphalt or block paving
- Free installation kit with every order

APPLICATIONS

Airports, logistics depots, supermarket and hospital car parks, retail and business parks, and access routes where driver comfort matters alongside speed reduction.

COMMON SPECIFICATION

MATERIAL

100% recycled tyre crumb rubber (solid, pre-moulded)

HEIGHT

75 mm

COLOURS

Black or red (other colours to order)

FIXING

Surface-fixed, installation kit included

SURFACES

Concrete, asphalt or block paving (subject to evaluation)

TOLERANCE

±1.5%

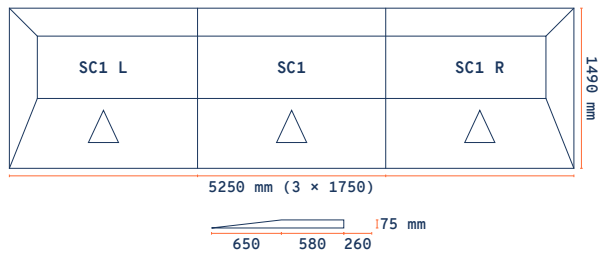

Modular units

Combine centre and handed end modules to suit carriageway width (e.g. 3 × SC1 = 5250 mm)

CODE	PLAN SIZE	HEIGHT	WEIGHT	PIECES	INSTALLATION
SC1	1750 × 1490 mm per module	75 mm	Contact for module weight	Modular	Under 30 minutes per run

OPTIONS & ACCESSORIES

- High-visibility directional arrow markings
- Cut-to-size modules for non-standard carriageway widths
- Handed left/right end modules (SC1 L / SC1 R)

SC1

1750 × 1490 mm per module
